AI & Health:
a reality for patients

Ivana Išgum & Clarisa Sánchez
qurAI

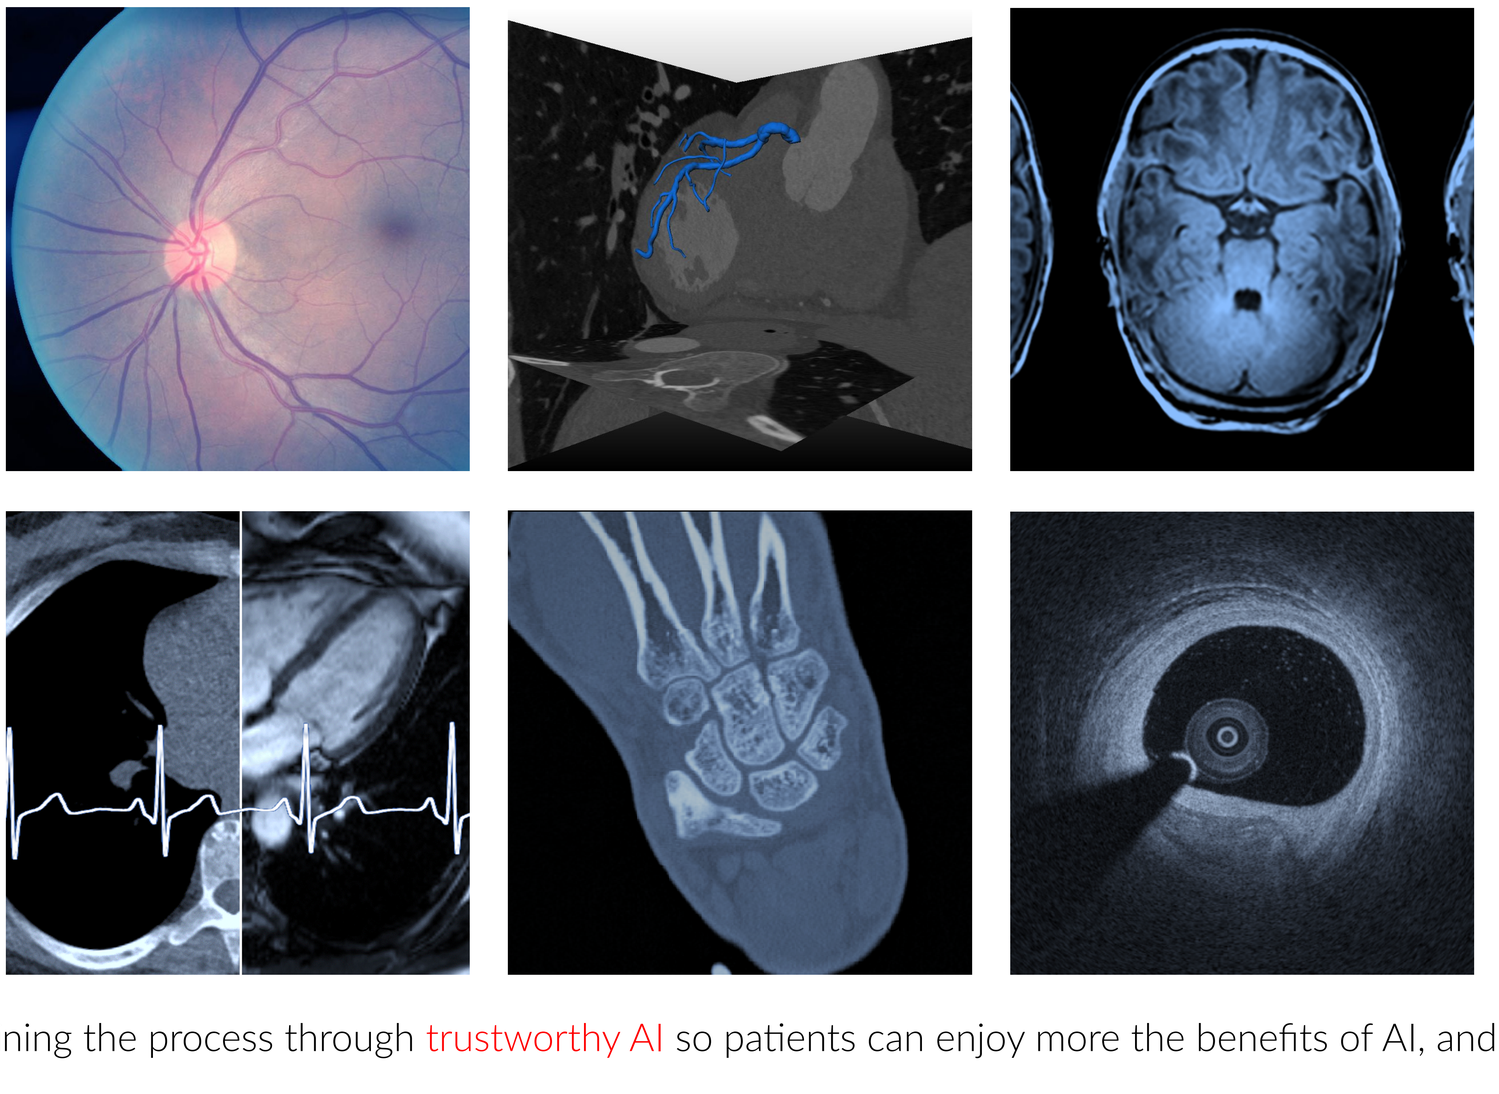

Amsterdam UMC

Our big picture

Make AI a daily reality for patients and caregivers.

Our vision

Designing foundation models for healthcare that can address general tasks in a more efficient way.

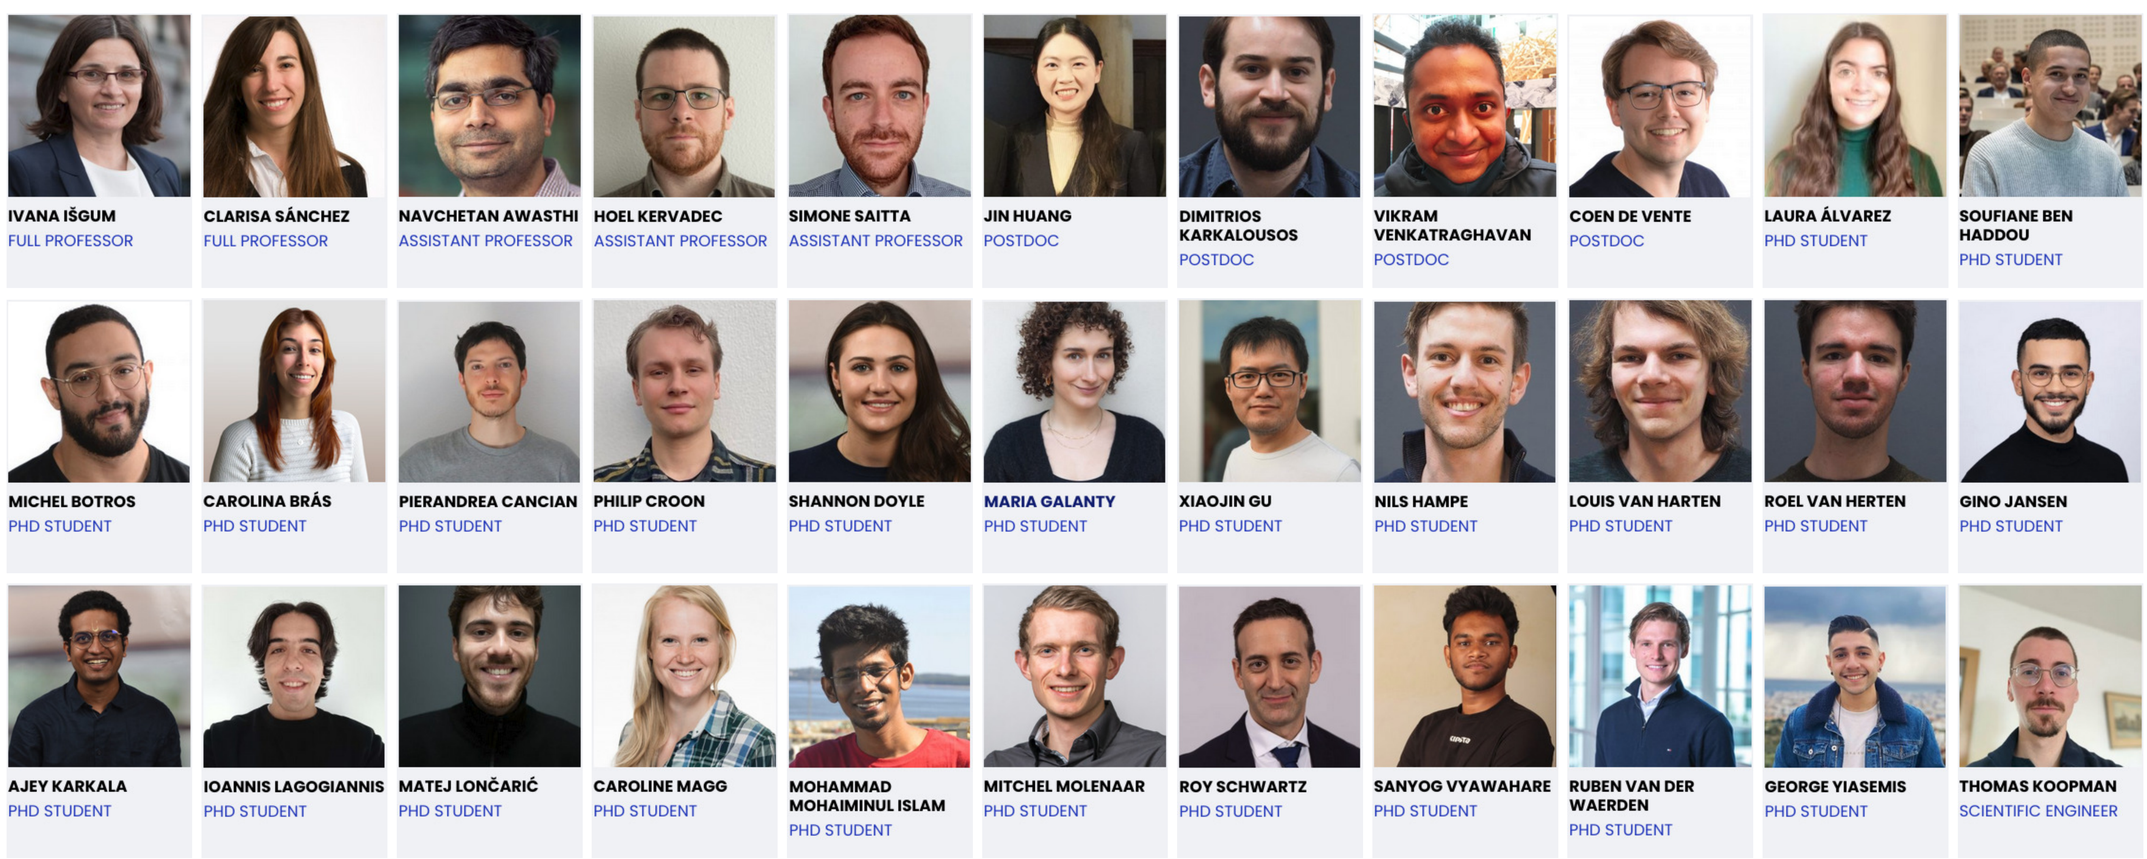

Streamlining the process through trustworthy AI so patients can enjoy more the benefits of AI, and faster.

Our challenges

- Data access that still follows privacy regulations.
- Legal and ethical aspects of AI adoption in society.
- Fit modern technology with long-established healthcare system.
- Enabling technology to transform clinical workflows.
